3.0 DESCRIPTION

Basic Use: BERGER Snow Meister SL-1 Snow Guard is a device designed for the prevention of damage caused by the sliding of snow and ice on standing seam metal roofs.

Limitations: BERGER Snow Meister SL-1 Snow Guard is designed to accommodate a single lock T seam roof 1.0" Deep x .575" wide Symmetrical design rotates 180 degrees to match seam lock orientation. Suited for is suited for light gauge sheet metals such as 40lb terne, 26 gauge galvanized, lead coated copper and TCS.

Finish Styles: BERGER Snow Meister SL-1 Snow Guards are manufactured in three finishes: Mill Finish, Primer Finish, and Custom Color Finish. The mill-finished is an unpainted aluminum casting. The primed is E Coated using a Cathodic Electro Deposition process. The CED Epoxy primer has a black color and extended shelf life that can be top coated by contractors with a wet or dry paint system. This primer must be top coated prior to installation. BERGER will also provide the SL-1 in a custom color finish. Imron® polyurethane enamel paint is used for the custom color finish and can be matched to virtually any non- metallic paint finish.

4.0 INSTALLATION

Preparation

Determining Proper Torque

Torque will vary depending on the type and gauge of the metal roof. The recommended method for determining proper torque is to install one unit first. After tightening the stainless steel set screws, loosen and remove the unit, inspecting the indentations created in the seam to see that the proper compression was obtained.

Application

Snow Guard Placement

Snow Guard placement will vary from region to region. Roof pitch, as well as lengths of runs and seam spacing influence the layout. Local custom may not be the best guide as to placement. Additional recommendations can be found in SMACNA and other industry standards. BERGER can provide free custom layout design. Ultimately, placement should be determined by a qualified design professional.

5.0 AVAILABILITY, COST & TECHNICAL SERVICE

BERGER Snow Meister SL-1 Snow Guards are in stock and ready for immediate shipment. Call (800) 523-8852 for cost and additional information or technical assistance

6.0 WARRANTY

Berger Building Products, Inc (BBPI) warrants that the products it manufactures shall be free from material defects. Should any of the products prove defective, the obligation of BBPI under this warranty shall be limited to replacement of the defective product or at our option the cost of the product originally shipped by Berger. BERGER BUILDING PRODUCTS, INC.

Snow Meister Snow Guards

Installation Instructions

The **Snow Meister** snow guard's primary design is to accommodate standing seam metal roofs. They are symmetrically designed to rotate 180 degrees to match seam lock orientation.

The **SL-1** (shown in mill finish) will fit single lock T seams up to 1" deep x .575" **Finishes:** Mill Finished Aluminum, Primer Finish and Custom Color

Installation: A 3/16" hex bit will be needed for installation. Torque will vary depending on the type and gauge of metal roofing. The recommended method for determining proper torque is to install one unit first. After tightening the setscrews, loosen and remove the unit, inspecting the indentations created in the seam to see that proper compression was obtained. **Over tightening can cause damage to snow guard resulting in failure. Maximum torque 20 ft lbs**

Snow guard Placement will vary from region to region and will be influenced by roof pitch, as well as the lengths of runs and spacing between seams. Local custom may not be the best guide as to placement, and additional recommendations can be found in SMACNA and other published industry standards. Ultimately, placement should be determined by a qualified design professional.

Berger Building Products, Inc (BBPI) warrants that the products it manufactures shall be free from material defects.
